

REMARKS

Applicants correct some rather awkward language in claims 26-31 and provide proper antecedent basis for a cured product in claims 29 and 30.

With respect to the change of “temperature atmosphere” to --temperature--, referring to page 95, line 9 to page 96, line 5, part of the disclosure first speaks of a predetermined temperature at lines 9-15, and then the next paragraph, at page 95, lines 16, begins with “For example” and then recites the temperatures of claims 26-31.

Page 95 is thus disclosure which teaches that claims 26-31 should actually relate to temperature, not atmosphere.

While it is true that “temperature atmosphere” occurs at other portions of the specification, “temperature atmosphere” does not really make much sense in the context of the claims.

If the Examiner would like to amend “temperature atmosphere” at other points in the specification, the undersigned can provide an indication of where the language occurs.

The Examiner is invited to contact the undersigned.

Respectfully submitted,

Peter D. Olexy
